Calculating the Size of your Custom Printed Car Wrap

Length x Width = Number of Square Inches. For example, if you have a decal that is 3" x 5" simply multiply **3 x 5 = 15 square inches**.

Note Regarding Clear Decals

Under **most circumstance** any colors must be **backed with white** to prevent the colors from appearing "washed out." The white can back-up **just the art** or the entire background. In cases where the graphics or copy is **thin or small**, a "**halo**" print may be required.
